

PN 1063 - Introductory Medical-Surgical Nursing (4 Credits)

Course Description

Introductory Medical-Surgical Nursing presents the basic concepts for maintaining or restoring adequate health and wellbeing of individuals and communities. In this course, you will compare general signs and symptoms of illness, disease processes, and disorders. You will identify measures that may be taken to treat and control illness, disease processes, and disorders while understanding the principles of ethics when providing nursing management and preventing or spreading the disease. The body's mechanisms, function, and diagnostics that aid identification will also be topics you will learn. The AACN Essentials for Professional Nursing Education provides the context for this course to guide students' learning and provide meaningful purpose. After completing this course, you will be able to perform fundamental nursing skills for the medical-surgical patient in the context of patient-centered care.
